

Guillermo Fuentes Quijada

HEAD OF ENGINEERING · ENGINEERING MANAGER

Ciudad Real, Spain

☎ (+34) 651 080 468 | ✉ guillermofuentesquijada@gmail.com | 📱 guillermofuentesgq | 🌐 guillermofuentesquijada | 🏠 Guillermo Fuentes-Quijada

Summary

Engineering leader and Head of Engineering with 8+ years of experience driving platform modernization, AI-enabled development, and product transformation across multidisciplinary teams. I currently lead 9 teams at Buk — an HR technology company with HCM, LMS, attendance control, and payroll solutions — spanning DevEx, AI-powered developer tools, DevOps, DevSecOps, and platform engineering. Across consecutive Engineering Manager and Head of Engineering roles, I have scaled the organization from a single team to a 9-team structure, establishing engineering practices that serve millions of users daily.

My leadership approach combines hands-on technical expertise (Ruby on Rails, Kubernetes, AWS, Symfony) with a track record of measurable impact: 30% cloud cost reduction through HPA and right-sizing, AI agent orchestration for automated code review and error resolution, and full-stack observability modernization using OpenTelemetry and Tsuga. I lead the platform foundations that enable secure, scalable, and reliable deployment of AI-powered product capabilities, APIs, and integrations. My Doctorate in Advanced Computing Technologies (BizDevOps & Enterprise Architecture) provides a structured framework for aligning engineering execution with business outcomes.

Based in Spain, I work remotely as a key engineering leader for Chilean-headquartered Buk, serving millions of users across Chile, Colombia, Perú, México, and Brazil.

Work Experience

Buk SpA

Chile (Remote from Spain)

HEAD OF ENGINEERING

Sep. 2025 - Present

- Leading a 9-team organization (45+ engineers) at Buk — an HR technology company providing HCM, LMS, attendance control, and payroll solutions to millions of users across Chile, Colombia, Perú, México, and Brazil. Own platform engineering, CI/CD, and Ruby on Rails development.
- Scaled the engineering organization from 1 to 9 teams in under 18 months across consecutive Engineering Manager and Head of Engineering roles, establishing team charters, career ladders, and delivery frameworks that improved predictability and reduced time-to-market.
- Founded the DevEx-AI team and built an agent orchestrator for automated code review, feature flag cleanup, and Sentry error resolution — reducing manual toil by an estimated 40% and measurably improving developer velocity.
- Leading the observability transformation with OpenTelemetry and Tsuga, replacing legacy monitoring with unified, distributed tracing across the entire platform — reducing MTTR from hours to minutes.
- Lead the platform foundations for product APIs and integrations, owning deployment workflows, infrastructure reliability, and performance to deliver responsive, scalable services.
- Provision and operate secure, scalable infrastructure that enables product teams to deploy AI-powered capabilities reliably.
- Define technical strategy, OKRs, and roadmaps in partnership with Product and Design; manage Engineering Managers through weekly 1:1s, OKR reviews, and strategic direction. Own career progression, promotions, compensation input, and administrative approvals across direct and indirect reports.

Buk SpA

Chile (Remote from Spain)

ENGINEERING MANAGER

May 2024 - Aug. 2025

- Managed a team of 6 engineers responsible for the infrastructure and core features of a Learning Management System (LMS) serving 2M+ active users — driving reliability, performance, and feature velocity.
- Reduced infrastructure costs by 30% through Horizontal Pod Autoscaling (HPA), right-sizing, and strategic AWS region migration from Chile to US — delivering measurable business impact while maintaining performance SLAs.
- Revamped deployment processes introducing ephemeral PR-based environments and automated CI/CD pipelines, accelerating feedback cycles from days to minutes and improving developer experience across the organization.
- Adopted a Platform as a Product approach, treating internal tooling as a product with clear SLIs, user research, stakeholder demos, and iterative improvement cycles — increasing internal NPS scores for the platform team.
- Led the hiring and onboarding of 8 engineers across multiple teams, establishing structured onboarding programs and reducing ramp-up time by 30%.
- Owned the platform foundations for APIs and integrations, improving deployment reliability, infrastructure performance, and service responsiveness for product teams.

Buk SpA

Chile (Remote from Spain)

STAFF SOFTWARE ENGINEER

Sept. 2021 - Mar. 2024

- Led technical design and end-to-end feature delivery for an LMS used by 500+ organizations, using Symfony and React — ensuring scalable, maintainable architectures in a high-stakes production environment with 99.9% uptime requirements.
- Implemented Horizontal Pod Autoscaling (HPA) driven by RabbitMQ metrics to optimize resource utilization under variable load, reducing average CPU waste by 25% and preventing recurring production incidents.
- Mentored 4 junior and mid-level engineers through structured pair programming, code reviews, and individual development plans — reducing technical debt by 20% through systematic upgrades and static analysis integration into CI pipelines.
- Drove the migration from a monolithic Symfony application to a service-oriented architecture, establishing API contracts and inter-service communication patterns that enabled parallel team development.

Freelance

Chile

FREELANCE SOFTWARE ENGINEER

2015 - 2020

- Delivered custom web applications across multiple industries (e-commerce, logistics, education) using Symfony, PHP, JavaScript, and modern frameworks — managing full project lifecycles from requirements gathering through deployment and maintenance.
- Built long-term client relationships through clear communication, reliable delivery, and post-launch support — achieving a 90%+ repeat engagement rate.

Education

University of Castilla-La Mancha, Spain

DOCTOR IN ADVANCED COMPUTING TECHNOLOGIES

Dec. 2020 - Feb. 2025

- Specialization in BizDevOps and Enterprise Architecture. Thesis on aligning software development approaches with enterprise architecture frameworks to improve IT/business alignment in DevOps-driven organizations.
- Published 4 peer-reviewed papers in top-tier journals (Information Systems Frontiers, Journal of Software: Evolution and Process) and international conferences (ICEIS).

University of Bío-Bío, Chile

MASTER IN COMPUTER SCIENCE

Mar. 2015 - Sep. 2017

- Specialization in Data Quality and Enterprise Architecture. Research focused on data quality assessment methodologies in enterprise environments.

University of Bío-Bío, Chile

BACHELOR OF COMPUTER SCIENCE

Mar. 2011 - Jan. 2016

- Specialization in BPMN Models and business process modeling.

Skills

Leadership	Engineering Management, Technical Strategy, Organizational Design, OKR Planning, Mentoring & Coaching, Product Transformation, Platform as a Product, Stakeholder Management, Budget Planning, Hiring & Scaling Teams
DevOps & Platform	AWS (EC2, EKS, RDS, S3, VPC, IAM), Kubernetes, Docker, Terraform, CI/CD (GitLab CI, GitHub Actions), Observability (OpenTelemetry, Grafana, Prometheus, Datadog, Tsuga), HPA, Cloud Cost Optimization
AI & DevEx	AI-Enabled Development, AI Agent Orchestration, AI Product Infrastructure, LLM Integration, Developer Experience (DevEx), Internal Developer Platforms (IDP), Developer Portals
Programming	Ruby on Rails, PHP, Symfony, Laravel, JavaScript, TypeScript, React, Java, Spring Boot, Python, SQL
Languages	Spanish (Native), English (B2 - Upper Intermediate)
Other	System Design, Distributed Systems, Microservices, Event-Driven Architecture, Domain-Driven Design, Agile/Scrum, BizDevOps, Enterprise Architecture (ArchiMate, TOGAF)

Certificates

2025	AWS Cloud Quest: Generative AI Practitioner, Amazon Web Services (AWS)	Credly
2025	AWS Cloud Quest: Generative AI Practitioner - Training Badge, Amazon Web Services (AWS)	Credly
2025	Agile Explorer, IBM	Credly

Publications

Information Systems Frontiers, Vol. 27(3), pp. 865-888

ENTERPRISE ARCHITECTURE AND IT GOVERNANCE TO SUPPORT THE BIZDEVOPS APPROACH: A SYSTEMATIC MAPPING STUDY

2025

- Systematic study on aligning Enterprise Architecture, IT governance, and agile DevOps practices — relevant for regulated, high-stakes environments.

Journal of Software: Evolution and Process, Vol. 37(3), e70016

IMPROVING IT/BUSINESS ALIGNMENT IN DEVOPS: BUSINESS CAPABILITY FOR ADOPTING BIZDEVOPS

2025

- Proposed a Business Capability framework to align technical execution with business strategy in DevOps-driven organizations.

26th Intl. Conf. on Enterprise Information Systems (ICEIS 2024)

AN ARCHITECTURAL VIEWPOINT FOR MANAGING BIZDEVOPS SOFTWARE PROJECTS

2024

- Defined an ArchiMate-based architectural viewpoint for managing software projects under BizDevOps.

Intl. Conf. on Enterprise Information Systems (ICEIS), pp. 201-219

CHALLENGES AS REGARDS ALIGNING IT AND BUSINESS WITH AGILITY WHEN APPLYING THE BIZDEVOPS APPROACH

2023

- Identified key challenges in maintaining business-IT alignment when adopting BizDevOps with agility.
